# YAHYAOUI NABIL

## Full-Stack Developer

I'm a web developer who's passionate about finding quick solutions to problems. I work well in team settings, and I have a history of being able to troubleshoot programming challenges easily in collaborative work. Using programs like HTML, CSS, Javascript and Node.js I have built projects that app services and desktop sites still use today. I meet continuous high standards for web design and development, and hope to continue doing so in a full stack developer position.

## SKILLS

JavaScript  
TypeScript  
HTML  
CSS  
React  
Angular  
Node.js  
Express
